## STARTER UNITS

### START THE RIGHT WAY

#### The first line of defence

Ensure a watertight and infestation-free roofing solution with the Rooftec Starter Units. Designed for ease of use in both new builds and refurbishment projects. These are an integral part of the Rooftec Universal Dry Verge system, designed to enhance the longevity and aesthetics of your roofing installation.

#### Effortless Installation

Rooftec Starter Units are designed for quick and easy installation, saving you time and effort during your roofing installations.

#### Infestation Prevention

Rooftec Starter Units effectively eliminates the risk of infestation from birds and small animals, preserving the integrity of your roof installation.

#### Universal Design

These components can be used on both sides of the roof, providing flexibility and convenience in your roofing system.

#### Weather-Resistant and UV Stable

Built to withstand the elements, ensuring long-lasting durability and reliability in various weather conditions.
